

Team Meeting

12 November 2023

Attendees

Blake Smith, Hale Coffman, Aidan Ingram, Landon Bever, Kyle Spragg

Agenda

Last Meeting Follow-up

1. In the last meeting we worked on filling out our Software Requirements sheet. Additionally, we began the coding process for our Arithmetic Expression Evaluator code.

New Business

2. Software Architecture Plan
3. Adding code to the Arithmetic Expression Evaluator

Notes

- Assign roles for Software Architecture sheet
- Discuss strategy for additional code on our project

Action Items

1. Each member of the company is given their assignment on the Software Architecture sheet
2. Began second iteration of Arithmetic Expression Evaluator code. The code will include addition/subtraction, which will include the input/output we used in the last iteration. We will also be adding multiplication/division, which will use all previous code that is written.
